CHANT SHEET

No more games! Don't you play!
EPL out of USA!

Richard Masters, you can't hide!
No more games for genocide!

Richard Masters, end this trip!
No games in dictatorship!

Summer Series, shut it down!
ICE has kidnapped in this town!

Civil rights: Trump trashes 'em!
No fixtures for fascism!

As long as Trump's a man who hates,
No games in United States!

NO FIXTURES FOR FASCISM

The world watches in horror as Donald Trump consolidates his bigoted dictatorship. Law enforcement and the military has been unleashed on the civilian population in a racist campaign to eliminate civil rights and due process. Each day, thousands of people are ripped from their communities by armed agents of the state and put into squalid prisons around the world in an effort to hide them from their loved ones and from justice.

Department of Homeland Security Secretary Kristi Noem shocked the world with her promotional speech filmed in front of a throng of shirtless men confined behind prison bars at El Salvador's infamous CECOT prison. As families attempted to recover their illegally deported family members, administration officials in both countries scoffed at the judge on social media.

The Trump administration, in league with authoritarian regimes around the world, are chipping away at the very cornerstones of due process, making anyone subject to arrest and deportation at any time without cause. The administration is ignoring legislative procedures as well as judicial authority in a blatant dictatorial power grab using the exact same methods of the original Fascists and Nazis of the early 20th century.

EPL OUT OF USA

In 2020, the Premier League decided to take a stand against racism, in the game and in society at large. Its commitment can be seen on the shoulder of every player's uniform as a patch reading "No Room for Racism." This campaign urged football supporters to "Challenge it, report it, change it" when they saw racism on and off the pitch.

We are here to challenge the Premier League, report the racism of the Trump regime, and call for the League to change its policy of complicity with US fascism in providing foreign entertainment at a time when foreigners are being forcibly detained and removed from the country en masse.

The Premier League must end its annual US Summer Series pre-season matches for as long as the country is governed by a fascist tyrant. This

complicity is not only a moral travesty, but it also puts players, coaches, referees, and staff—particularly those of color—at risk for arrest, interrogation, detention, and deportation at customs and in the streets as has happened to so many thousands of others in the past few months.

THE PETITION

We are collecting signatures for a petition drive to Premier League CEO Richard Masters to end ties with the US starting by cancelling the US Summer Series. These series of games make a circus of a slaughterhouse, fiddling right along as the Constitution burns.

THE BOYCOTT

We are calling for a full boycott of the US Summer Series. If you haven't bought tickets, don't. If you've already bought tickets, keep them and don't go inside. Tell your friends to do the same.

We will be protesting at the following locations:

July 26 - Metlife Stadium, Rutherford, NJ
July 30 - Soldier Field, Chicago, IL
Aug 3 - Mercedes-Benz Stadium, Atlanta, GA

THE CLUB CAMPAIGN

We are organizing fans to get together with their clubs to lobby the locker room to take up the No Fixtures for Fascism campaign as well. Each club's fans will pick a player or coach to write a mass letter to, appealing to their consciences to spread the campaign in their clubs and pressure the League to take a stand against the Trump dictatorship.'
